

MUNICIPAL/CIVIL ENGINEERING TECHNOLOGIST/EIT MAIN STREET ENGINEERING LTD

WHAT WE DO

Main Street Engineering Ltd. is a trusted civil engineering consulting firm, delivering professional services throughout the project lifecycle – from advisory, planning, design, and engineering to construction management. Our projects span land development and municipal infrastructure. We help our clients to solve their most complex challenges in Niagara Region.

THE IDEAL CANDIDATE

We are looking for a civil/municipal engineer-in-training (EIT) that has **2+** years experience in the field. The ideal candidate shall have design and construction experience in both land development and municipal fields.

WHAT TO EXPECT

We are a small, passionate team who values teamwork and personal growth. Our office dynamic is fast-paced, supportive, and provides the right candidates the tools required to develop their skills and career in Civil Engineering while working in a friendly and inclusive environment.

Responsibilities

- Design for municipal infrastructure using AutoCAD and Civil 3D.
- Prepare civil /drainage design drawings, and design calculations
- Collection and interpretation of field data
- Road reconstruction, land development, lot grading, stormwater management and site servicing plan design
- Ensuring overall data quality and integrity

Qualifications

Minimum Requirements:

- Bachelor's degree in civil engineering, registered as an EIT with PEO
- + 2 year of related experience in municipal/civil engineering
- 12 months+ experience using Civil 3D and AutoCAD

Preferred Qualifications:

- Experience creating base plans from collected survey data
- Experience with quantity take-offs

- Prepare quantity take-offs and cost estimates for civil projects
- Prepare documentation for design projects and reports
- construction site inspection

- Experience in municipal, transportation, or civil engineering CAD/ grading design
- Experience in drainage and stormwater management design for infrastructure projects (roadway, municipal utilities, etc.)
- Design experience with surface grading, sewer pipe networks, and detailed design
- Experience in construction to inspect municipal infrastructure (watermain, storm sewer, sanitary sewer systems)
- Proficient with MS Office Suite
- Excellent attention to detail
- Ability to communicate effectively with colleagues, contractors, and clients
- Good time management skills
