

MUNICIPAL/CIVIL ENGINEERING TECHNOLOGIST MAIN STREET ENGINEERING LTD

WHAT WE DO

Main Street Engineering Ltd. is a trusted civil engineering consulting firm, delivering professional services throughout the project lifecycle – from advisory, planning, design, and engineering to construction management. Our projects span land development and municipal infrastructure. We help our clients to solve their most complex challenges in Niagara Region.

THE IDEAL CANDIDATE

We are looking for a talented and hardworking civil engineering technologist that has **3+** years experience in the field. The ideal candidate shall have design and construction experience in both land development and municipal fields.

WHAT TO EXPECT

We are a small, passionate team who values teamwork and personal growth. Our office dynamic is fast-paced, supportive, and provides the right candidates the tools required to develop their skills and career in Civil Engineering while working in a friendly and inclusive environment.

Responsibilities

- Design for municipal infrastructure using AutoCAD and Civil 3D.
- Collection and interpretation of field data
- Road reconstruction, land development, lot grading, stormwater management and site servicing plan design & drafting.
- Ensuring overall data quality and integrity
- Prepare quantity take-offs and cost estimates for civil projects

Qualifications

Minimum Requirements:

- Civil Engineering Technology diploma
- + 3 years of related experience in municipal civil engineering
- 12 months+ experience using Civil 3D and AutoCAD
- Candidates must also possess a valid Class G Driver's License

- Conduct topographic and construction surveying using GPS survey equipment.
- construction site inspection

Preferred Qualifications:

- Certified or eligible for certification as a CET and a member of the Ontario Association of Certified Engineering Technicians and Technologists
- Experience creating base plans from collected survey data
- Experience with quantity take-offs
- Experience in municipal, transportation, or civil engineering CAD/ grading design and drafting
- Experience collecting survey data and performing construction layout surveys using GPS, Total Station, and/or conventional survey equipment is preferred.
- Experience in construction to inspect municipal infrastructure (watermain, storm sewer, sanitary sewer systems)
- Proficient with MS Office Suite
- Excellent attention to detail
- Ability to communicate effectively with colleagues, contractors, and clients
- Good time management skills
